SUMMARY

AI/ML engineer with a background in full-stack web development and a Post-Graduate Diploma in Artificial Intelligence. Shipped 4+ production AI systems in under a year, cutting manual legal-document handling by ~70% and accelerating case-data sync from hours to minutes.

EXPERIENCE

AI Engineer

09/2025 – Present

LexCloud Software Pvt. Ltd. · Pune, MH – Legal-tech SaaS for personal-injury law firms

- Contributed to **Amicus (Lexee Agentic Platform)**, a multi-tenant agentic AI system (supervisor + sub-agents + workers) serving 10+ law firms; re-architected the CloudLex data-sync pipeline on Azure Functions & Service Bus, cutting sync latency ~85% (hours → minutes), and hardened CI/CD to reduce failed deploys ~60% (LangGraph, LiteLLM, FastAPI, PostgreSQL, Azure).
- Built backend services for **Lexvia Document Intelligence** — a FastAPI + Azure Functions platform processing 5k+ legal documents/day with queue-based matter identification (~95% routing accuracy), extraction/indexing pipelines, and a RAG-based Q&A chatbot scoped to firm and matter context.
- Developed the **Lexvia Services desktop app** (Electron, React 18, TypeScript, MUI): document management with AI-assisted extraction, indexing, review workflows, PDF grouping/preview, and an embedded Lexee chat assistant.
- Shipped **Lexee**, a GPT-4o-powered marketing chatbot with LangGraph conversation flows and full HubSpot integration — automated lead qualification and booked meetings end-to-end, lifting qualified-lead capture ~40% while cutting manual SDR triage — deployed via Docker with IP-whitelisting security middleware.

Front-End Development Trainer

06/2023 – 10/2023

CyberGrow Programming Institute · Indore, MP

- Led front-end training and contributed to project estimation, scope, and planning.
- Tracked participant progress and gathered feedback to improve training effectiveness.

SELECTED PROJECTS

Amicus – Agentic AI Platform

- Architected a supervisor agent that routes requests to specialized sub-agents and pluggable skills for document drafting, ingestion, and back-office automation across a multi-tenant legal case workflow.
- Implemented durable, resumable agent runs via LangGraph checkpoint persistence on PostgreSQL with idempotent Alembic migrations — auditable multi-turn chat with in-place retry and regeneration, reducing failed-run recovery time ~90%.
- Created a provider-agnostic LLM abstraction (ChatLiteLLM) with transient-error retry policies, and an Azure Function publishing CloudLex changes to Service Bus for worker-driven case-data sync.
- Delivered production CI/CD on Azure Pipelines with an approval-gated QA stage, container-job log surfacing, and Dockerized local orchestration — cutting release cycle time from days to under an hour.

TECH · Python · LangGraph · ChatLiteLLM · PostgreSQL · Alembic · Azure Functions · Service Bus · Azure Pipelines · Docker

Lexvia UI – Desktop Document Intelligence

- Engineered a cross-platform Electron + React desktop app delivering AI-powered legal document intelligence for CloudLex — ingest, extract, index, and query case documents at scale.
- Built the embedded Lexee AI chat assistant and AI-assisted extraction/indexing workflows with an Indexing Management dashboard for automated review and retrieval.
- Added full-text search with rich filtering and pagination, plus in-app PDF/image viewing with Konva-based annotation, zoom, and pan for high-fidelity review.
- Designed a secure main/preload/renderer architecture with auto CloudLex authentication, auto-updates, and DOCX/PDF export pipelines.

TECH · Electron · React 18 · TypeScript · Material UI · Vite · electron-updater · Konva · pdf-lib · docx · CKEditor 5

Lexvia Backend – Document Processing Service

- Developed a FastAPI + Azure Functions backend powering CloudLex's Lexvia platform with asynchronous, queue-based ingestion of PDF and non-PDF legal documents.
- Created a RAG-style Document Intelligence chatbot for conversational Q&A over case files, scoped by firm and matter IDs with persistent history, plus a Daily Mail chatbot and digest service.
- Wrote an Identify-Matter Azure Function classifying incoming documents to the correct firm and matter at ~95% accuracy, with extraction/indexing pipelines as idempotent, retry-safe background workers.
- Structured a modular service architecture — SQLAlchemy models, Pydantic schemas, timezone-aware querying, structured logging, Docker deployment.

TECH · Python · FastAPI · Azure Functions · Storage Queue · PostgreSQL · SQLAlchemy · Pydantic · RAG · Unicorn · Docker

Marketing Chatbot – Lexee Lead-Gen Agent

- Launched a GPT-4o-powered marketing chatbot for the CloudLex website that conducts natural-language conversations, qualifies leads, and books introduction meetings end-to-end.
- Modeled a graph-based conversational agent with versioned prompt sets to detect buying intent, capture visitor details, and orchestrate multi-turn lead qualification.
- Integrated HubSpot CRM APIs to create/update contacts, apply association types, and schedule meetings directly from chat — eliminating manual CRM data entry — behind a FastAPI backend with IP-whitelisting middleware.

TECH · Python · FastAPI · OpenAI GPT-4o · LangGraph · HubSpot API · Docker Compose · uv · JavaScript

TECHNICAL SKILLS

LANGUAGES	C/C++, Python, JavaScript, HTML/CSS, SQL
FRAMEWORKS	React.js, FastAPI, Electron
ML / DEEP LEARNING	Scikit-learn, XGBoost, TensorFlow, Keras
GEN-AI	LangGraph, LiteLLM, RAG, Prompt Engineering, Agentic AI
DATA	Exploratory Data Analysis, Pandas, Data pipelines
CLOUD / DEVOPS	Azure Functions, Azure Service Bus, Docker
TOOLS	VS Code, Git, Cursor, Claude Code, Alembic

EDUCATION

C-DAC ACTS, Pune	02/2025 – 08/2025
PG Diploma · Artificial Intelligence · Pune, India · 80.80%	
Shri Vaishnav Vidyapeeth Vishwavidyalaya	2019 – 2023
B.Tech · Information Technology · Indore, India · CGPA 7.14	
D.A.V. B.O.R.L. Public School	2017 – 2018
Class 12th · Bina, India · 75.2%	
Nirmal Jyoti Sr. Sec. School	2015 – 2016
Class 10th · Bina, India · CGPA 8.2
